Sektöre Yön Veren Marka

Leads the sector forward

Özdil Pancur Sanayi ve Ticaret Anonim Şirketi, 1970 yılında panjur ve kepenk sektörünün öncülerinden Kadri Özdil tarafından kuruldu. Yatırımlarla ve müşterilerine verdiği güvenle büyüyerek ALUSEL markasıyla sektörün liderleri arasına girdi.

Panjur, kepenk, garaj kapısı, endüstriyel kapılar, motor ve kontrol sistemlerinden oluşan ana ürün gruplarımızı, müşterilerin sürekli değişen ve yenilenen ihtiyaçları doğrultusunda yüksek kaliteli malzemeleri kullanarak, en yeni teknoloji ile donatılmış tesislerimizde imal ediyoruz. Kırklareli Organize Sanayi Bölgesi'nde 20.000 m² kapalı alana kurulu tesisimizde hammaddenin işlenmesinden proje teslimine kadar olan tüm süreçlerde donanımlı ve tecrübeli personelimizle müşterilerimize hizmet veriyoruz.

Üretim ve kurulum aşamaları için kendi bünyemizde istihdam ettiğimiz yetkin ve uzman personelimizin yanı sıra, bayilerimize düzenli eğitimler ve teknik destek vererek, modern sistemler için gerekli donanımın tedarikinde ve yeni tekniklerin kullanılmasında karşılaşılabilecek sorunların çözülmesini sağlıyoruz.

ÖZDİL PANCUR'un sunacağı teknik eğitimi, profesyonel faaliyetleri ve pazar desteği faaliyetlerini kolaylıkla kavrayabilecek, güvenilir bayilerle uzun vadeli ticari ilişkiler kurmayı amaçlıyoruz.

Özdil Pancur Sanayi ve Ticaret Anonim Şirketi (Özdil Pancur Manufacturing and Trade Corporation) was founded in 1970 by Kadri Özdil, one of the pioneers of the shutter and rolling door sector. It has become one of the leaders in the sector with the ALUSEL brand by growing with investments and its customers' trust.

We manufacture our main product groups consisting of shutters, rolling doors, garage doors, industrial doors, motors and control systems in our facilities equipped with the latest technology, using high-quality materials in line with the constantly changing and renewed needs of our customers. We serve our customers with our well-equipped and experienced personnel throughout the whole operation from processing the raw material to project delivery in our facility established on a 20,000 m² closed area in Kırklareli Organized Industrial Zone.

In addition to our competent and experienced personnel employed in our own organization for the production and installation stages, we provide regular training and technical support to our dealers, ensuring that possible problems that may be encountered in the supply of the necessary equipment for modern systems and the use of new techniques are resolved.

We aim to establish long-term commercial relationships with reliable dealers who can easily understand the technical training, professional activities and market support activities that ÖZDİL PANCUR would offer.

Başlangıçta ithal ettiğimiz panjur ve kepenk sistemlerinde kısıtlı bir ürün grubuna sahipken, yıllar içinde sektöre yaptığımız yatırımlar ve Ar-Ge çalışmalarıyla hem yenilikçi ürünler ve teknolojiler geliştirdik hem de ürün gamımızı zenginleştirdik. Konutlardan büyük çaplı endüstriyel projelerin çözümüne kadar tüm tüp ve endüstriyel motor gruplarında, alüminyum ve çelik profillerde, aksesuarlarda ve diğer yardımcı elemanlarda her türlü ihtiyacı karşılayacak seviyeye ulaştık. Bu sayede, Türkiye ekonomisine katkıda bulunan ihracatçı bir firma olma başarısını elde ettik.

Bugün Türkiye genelinde hizmet verdiğimiz 130 ana bayi, yüzlerce uygulama bayisi ve servis ağıımızın yanı sıra, Avrupa, Balkan, Afrika, Asya, Amerika ve Orta Doğu ülkelerine ihracatımız bulunuyor.

ALUSEL markasını ve kalitesini sektörde ön plana çıkarmanın yanında, İtalya ve Almanya'daki modern tesislerde üretilen MOSEL, SETKEPENK, EUROSEL, SELECTRO gibi markalarımızla farklı ihtiyaçlara yönelik kapsamlı çözümler üretiyoruz.

Dürüstlüğü, güvenilirliği ve müşteri memnuniyetini merkeze alan üretim ve hizmet anlayışımızla, yüksek kaliteli, modern, çevreye duyarlı ürünler geliştirmeye ve sektörün öncü markası olmaya devam edeceğiz.

While we initially had a limited product group in the shutter and rolling door systems we imported, over the years we have developed innovative products and technologies and enriched our product range with the investments we made in the sector and R&D studies. We have reached a level that can meet all kinds of needs in all tube and industrial motor groups, aluminum and steel profiles, accessories and other secondary elements from houses to large-scale industrial project solutions. In this way, we have achieved the success of being an exporter company that contributes to the Turkish economy.

Today, in addition to our 130 main dealers, hundreds of application dealers and service network which serve throughout Türkiye, we export to countries in Europe, the Balkans, Africa, Asia, America and the Middle East.

In addition to bringing the ALUSEL brand and quality to the forefront in the sector, we produce comprehensive solutions for various needs with our brands such as MOSEL, SETKEPENK, EUROSEL, SELECTRO produced in modern facilities in Italy and Germany.

With our production and service approach that focuses on honesty, reliability and customer satisfaction, we will continue to develop high quality, modern, environmentally friendly products and become a brand that leads the sector forward.

ALUSEL ürünlerinin avantajları

Advantages of ALUSEL products

Güvenlik Security

Gerek konutlarda gerek iş yerlerinde hırsızlığa, dışarıdan gelebilecek saldırılara karşı en modern ve sağlam önlemlerin başında panjur ve kepenk sistemleri gelir.

Both in residences and workplaces, shutter and rolling door systems are among the most modern and robust precautions against theft and attacks from outside.

Mahremiyet Privacy

Birbirlerine çok yakın inşa edilen günümüz binalarında, panjurlar bulunduğunuz mekanı istenmeyen bakışlara karşı korur.

In today's buildings which are built very close to each other, shutters protect your private space from unwanted looks.

Isı ve Ses Yalıtımı

Thermal and Acoustic Insulation

Panjurlar yazın sıcaklığa ve güneş ışınlarının etkilerine, kışın ise soğuğa karşı yalıtım sağlayarak hem tasarruf yapmanızı hem de daha konforlu yaşamınızı sağlar. Ayrıca alüminyum panjurlar dışarının gürültüsünü 10 desibele kadar örtterek gürültü kirliliğini önler.

Shutters provide insulation against heat and sun rays in summer and cold in winter, allowing you to both save money and live more comfortably. In addition, aluminum shutters prevent noise pollution by covering up to 10 decibels of outside noise.

Estetik ve Konfor

Aesthetics and Comfort

Panjur ve kepenk sistemleri hem görsel estetiğiyle hem fonksiyonelliğiyle yaşadığınız ortama değer katar. Elektronik sistemlerin kolay kullanımı, akıllı ev sistemlerine uygunluğu sayesinde yaşam konforunuz artar.

Shutter and rolling door systems add value to your living environment with both their visual aesthetics and functionality. Thanks to the easy use of electronic systems and their compatibility with smart home systems, your life comfort increases.

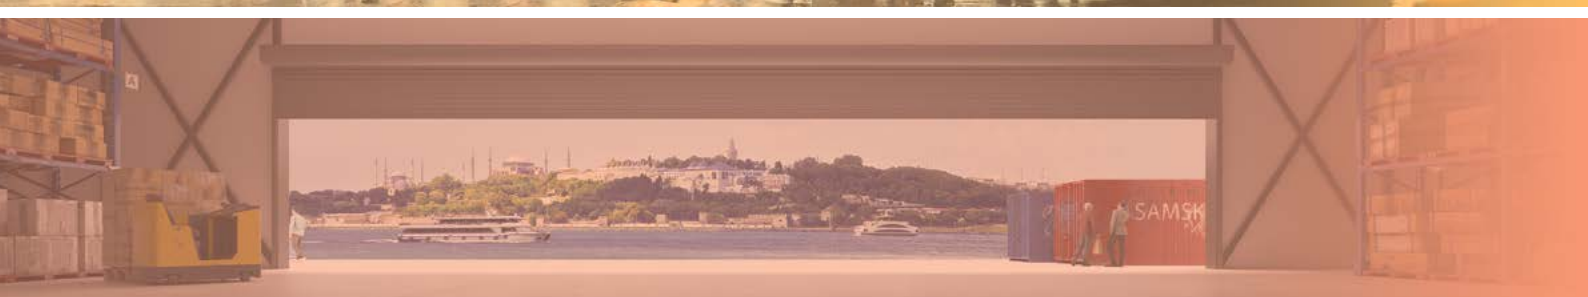

Hava Koşulları

Weather Conditions

Panjur ve kepenkler, değişen iklim koşullarıyla gittikçe daha sık görülen dolu, fırtına, hortum gibi sert hava olaylarına karşı evinize ve iş yerinize etkin koruma sağlar.

Blinds and shutters provide effective protection for your home and workplace against harsh weather events such as hail, storms and tornadoes, which are becoming increasingly common with changing climate conditions.

Sürtünmeye Dayanıklı Özel Boya Malzemesi Kaplı Alüminyum

SP-80® ve ROLL-PLUS®, poliamid ile rafine edilmiş, yüksek kaliteli poliüretan'a dayalı, sürtünmeye direnç gösteren özel bir boya sisteminin adlarıdır. Bu ürünler, dayanıklı kumaşlar, şanzıman dişlileri ve bir sürü diğer alanda uygulanmakta, genel olarak Nylon ticari adıyla anılmaktadır. Sürekli levha kaplama prosesi kullanılarak boya malzemesi ön işleme tabi tutulmuş alüminyum bantlara iki kat olarak uygulanmakta ve pişirilmektedir.

Prepainted Aluminium with Abrasion-resistant Structured Coating

SP-80® and ROLL-PLUS® are the names for a particularly abrasion-resistant paint system based on high quality polyurethane refined with polyamide. Polyamides have particularly high tear and wear resistance. They are used, for example, to make very durable fabrics and gearwheels, among other things, and are generally known under the trade name Nylon. Using the continuous coil-coating process, the paint is applied to specially pretreated aluminium strip in two layers and cured.

Kaplama Özellikleri

Coating Characteristics

Kimyasal Ön İşlem

Malzeme, kaplama yapılmadan önce her iki yüzünden yağları alınır ve kromdan kimyasal olarak titanyum kompleks tuzlarıyla arındırılır.

Üst Yüz

Biçimlendirilmiş poliamid sistemi

Boya sistemi (alt boya + saydam kaplama)

Tipik kalınlık: 30 [µm]

Chemical Pre-treatment

Before coating of the material the oils at both sides are cleaned and bowdlerized chemicaly from chromium with titanium complex salts.

Top Side

Structured polyamide system

Paint system (base coat + clear coat)

Typical thickness: 30 [µm]

Parlaklık Derecesi / Brilliance Level

Parlaklık tipi / Gloss type	Yarı mat / Semi-gloss
Parlaklık aralığı (parlaklık birimi) / Gloss range (gloss units)	21 ÷ 60
Tolerans / Tolerance	± 7

Alt Yüz

Arka yüz kaplaması: yarı saydam polyester, mevcut poliüretan çeşitleri (düşük, orta ve yüksek yoğunluklu) ve yapıştırıcılara yapışma özelliği

Tipik kalınlık: 4 [µm]

Parlaklık derecesi: 30 [gloss units]

Reverse Side

Backing coat polyester (semitransparent) suitable for adhesive bonding with most available polyurethane (low, medium, high density) and glues.

Typical thickness: 4 [µm]

Brilliance level: 30 [gloss units]

Kaplama Sertliği

Kaplama sertliği: > Kalem sertliği (ECCA T4'e göre)

Coating Hardness

The coating hardness is: > pencil hardness (acc. to ECCA T4)

Yüzey Kalitesi

Üst yüz, panjurun estetik görünümünü olumsuz etkileyecek her türlü bozukluktan arındırılmış olmalıdır. (Örneğin, portakal kabuğu etkisi, parlaklık çizgileri, çizikler, kir, v.s.). Gözle muayene gün ışığında en az 1 metre mesafeden yapılmalıdır.

Surface Quality

The top side has to be free from any imperfection which affects the aesthetic appearance of the roller shutter (i.e. orange peel effect, gloss stripes, scratches, dirt, etc.). Visual inspection should be carried out in daylight at a distance of at least 1 (one) meter.

Bu ürünlerde kullanılan boyalarda çevreye hiç bir şekilde zehirli madde yayılmaz.

Panjurlarda kullanılan boyalı malzeme sağlık için hiçbir risk taşımamakta ve bu nedenle gıda üretim tesisleri, hastaneler ve sair kamu binaları gibi yerlerde rahatlıkla kullanılmaktadır.

Kalite Kontrol

Kalite kontrol Alcan'in kendine has standartları, EN normları, ASTM ve ECCA'nın (Avrupa Levha Kaplama Birliği) bildirelerine göre yapılmaktadır.

Aşağıdaki parametreler belirtilen standartlara göre test edilmektedir.

No toxic substances are released into the environment from paints used for these products.

Prepainted sheet for roller shutters does not represent any danger to health, and is suitable for applications in food processing locations, hospitals, public areas, etc.

Quality Control

Quality control is carried out in accordance with Alcan internal standards, the norms EN, ASTM and the guidelines of the ECCA (European Coil Coating Association).

The following parameters are tested according to the corresponding standard:

ALUSEL® yüksek kalitesi ve güvenilirliğinden dolayı Dow Poliüretan Sistemlerini kullanmaktadır.

VORACOR® CS 624 Poliol ve VORACOR® CS 678 izosiyanat Dow Kimya Şirketinin tescil edilmiş markalarıdır.

Bu iki ürün, bilgisayar kontrollü sürekli prosesle imal edilen panjur profillerinin sert poliüretan köpüklerinin imali için tasarlanmıştır. Her iki kimyasal elemanın reaksiyonu, uygun fizik özelliklere ve boyutsal dengeye sahip, aynı zamanda iç yüzeylere iyi yapışabilen köpüklerin elde edilmesini sağlamaktadır.

Üretilen köpük ISO 3582 normuna uygun olarak yanmaya karşı dayanıklılık gösterici özelliklere sahiptir. CFC içermeyen köpük Avrupa normlarına uygundur. VORACOR® CS 624 poliol herhangi bir alojene gaz yayma elemanı içermemektedir.

ALUSEL® Utilizes: Dow Polyurethane Systems for their high quality and reliability.

VORACOR® CS 624 Polyol and VORACOR® CS 678 Isocyanate are both registered trademark of Dow Chemical Company.

They are designed for the production of polyurethane rigid foams for manufacture of rolling shutters via computer controlled continuous process. The reaction of both elements gives foams with good physical properties and dimensional stability as well as good adhesion to usual facings.

The resulting foam is combustion modified according to ISO 3582 norm. The CFC-free foam is in conformity with European regulations. VORACOR® CS 624 polyol does not contain any alogenated blowing agent.

Ekstrüzyon Ürünlere Uygulanan Toz Boya Malzemesinin Özellikleri

Specification of Powder Coatings Applied on Extruded Products

Ürün kodu / Product code	04 ve 07 serisi / 04 and 07 series
Ürün adı / Product name	RAL ya da özel / RAL or special
Ürün tipi / Product type	Polyester / TGIC
Bileşimi / Composition	Karbon polyester, TGIC sertleştirici, pigmentler ve genleştiricilerin farklı oranlarına dayanır. Based on different proportions of carboxylated polyester, TGIC hardener, pigments and extenders
Tüketimi / Consumption	Özgül ağırlık ve kalınlığa göre değişmek kaydıyla 1 kg toz 8-12 m² metal levha kaplamaktadır. According to specific gravity and thickness of the film, 1 kg of powder coats 8-12 square meter of metal sheet

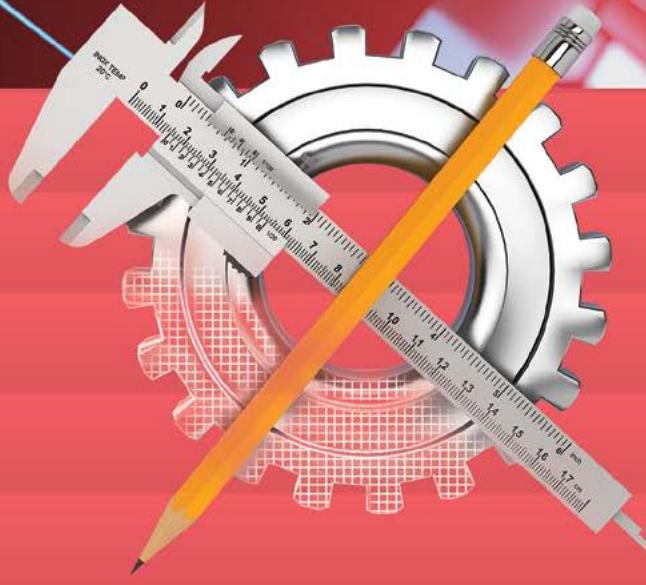

Fiziksel Özellikler / Physical Properties

Test metodu / Testing method	Birim/Unit	Standart/Standard	Değerler/Values
Yüzey görüntüsü / Surface appearance	-	Değişik/Variou	Değişik/Variou
Renk/Color	-	Değişik/Variou	Değişik/Variou

Doğru Ölçü Alma

Taking Correct Measures

- Uygun ölçme aleti kullanınız (şerit metre, lazer metre v.s.)
- Seçilen pozisyonda panjurun yerleştirildiğini varsayarak aşağıda anlatılan ve gösterilen şekilde ölçü alınız.

- Use suitable measuring tool (tape measure, laser meter etc.)
- Take measure as shown on the figures below by supposing that the rolling shutter had fixed at chosen position.

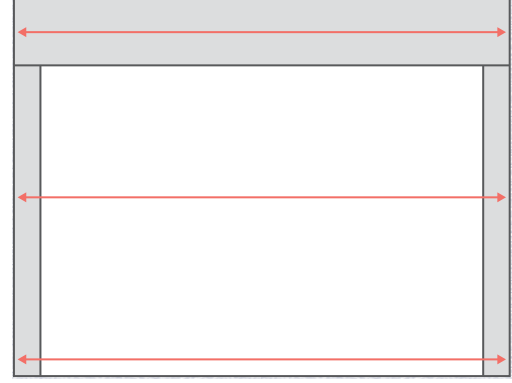

Yükseklik Ölçüsü Almak İçin;

- Şekildeki gibi en az 3 noktadan kutu dahil (sarım dahil) olarak ölçünüz.
- En kısa ölçüden 2-3 mm düşünüz.
- Alınan ölçü kutu dahil (sarım dahil) ölçüdür.

For Taking Height Measure:

- As shown on the figure, take measure from at least 3 points box included (wraparound included)
- Reduce 2-3 mm from the shortest size.
- Taken size is box included size (wraparound included)

Genişlik Ölçüsü Almak İçin;

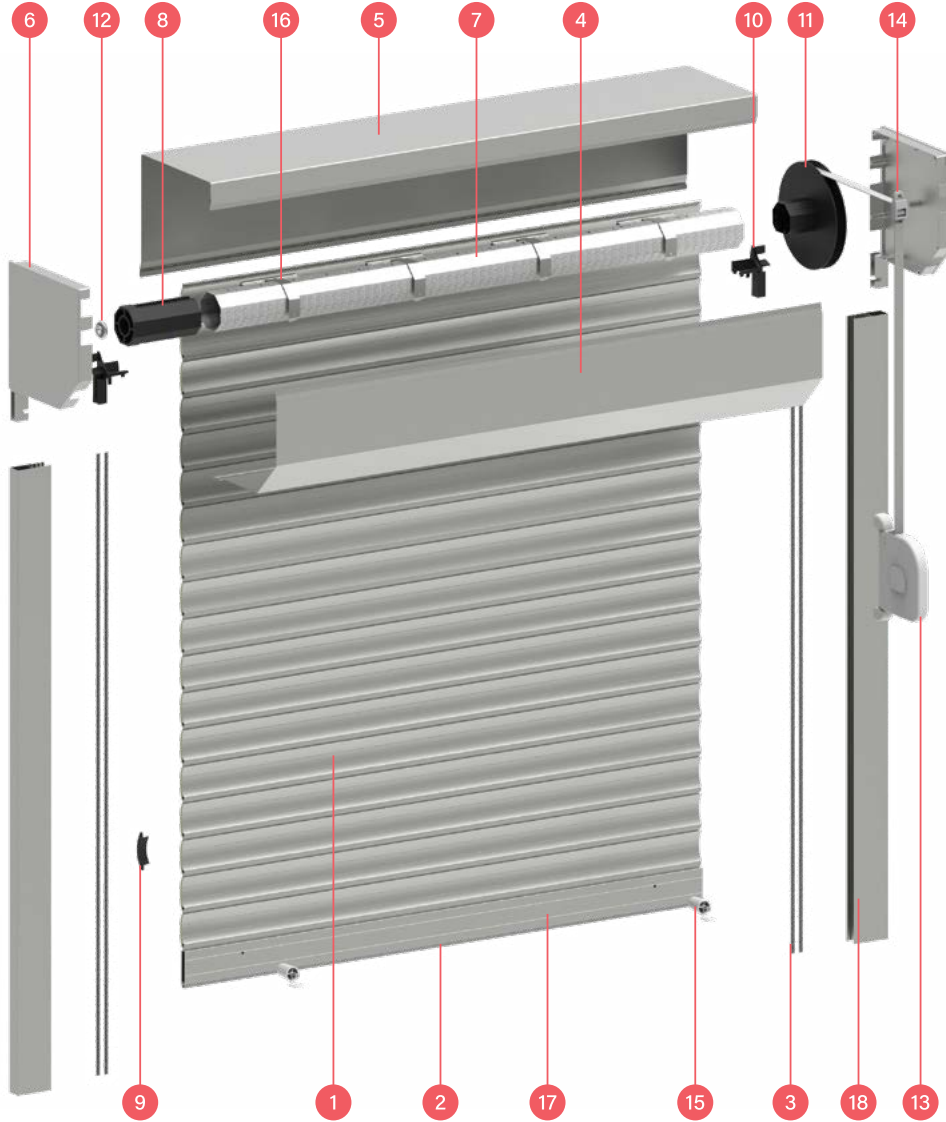

- Şekildeki gibi en az 3 noktadan kutu dahil (sarım dahil) olarak ölçünüz.
- En kısa ölçüden 2-3 mm düşünüz.
- Alınan ölçü dikmeli "U" dahil (sarım dahil) ölçüdür.

For Taking Width Measure:

- As shown on the figure, take measure from at least 3 points box included (wraparound included)
- Reduce 2-3 mm from the shortest size.
- Taken size is guide channel included size (wraparound included)
